Experience a diverse range of session types

The World Congress of Neurology will offer a rich and varied selection of session types, catering to the diverse interests and needs of attendees.

Interactive sessions that will offer practical training and hands-on experience on specific topics related to neurology. Keynote lectures delivered by distinguished speakers, covering broad and innovative topics related to

neurology. Educational sessions that will cover fundamental or advanced concepts in neurology, designed for attendees to enhance their knowledge and skills. Engage in candid conversations with current and past WFN leaders and get insights into WFN's dynamic educational projects. These interactive sessions will feature opposing views on controversial topics in neurology, providing attendees with different perspectives and stimulating discussions. Sessions that will explore specific regional issues and challenges related to neurology, and highlight local research and clinical developments. Presentations of original research findings or case studies submitted by attendees, selected by the scientific committee based on their quality and relevance to neurology. These sessions offer an opportunity for attendees to share their work, receive feedback, and learn about cutting-edge research and clinical practices. Meet with our esteemed plenary speakers! Engage in interactive dialogues that bridge the gap between theory and practice.

Brain health is our greatest wealth

Join us at WCN 2023, where we are dedicated to promoting brain health and advancing the field of neurology. Through extensive research, practice, and collaboration, we have curated an exceptional scientific program and teaching sessions. We warmly invite you to be a part of this inspiring global educational event!
